Christine Ren (12/7 5:25 pm): wow. That's very worrying for her. She has really lost it. I can't say I have ever seen such behavior. She's really going to screw herself and I feel so bad for

Christine Ren (12/7 5:25 pm): For her

Me (12/7 5:28 pm): ...yeah..but her neighbor says she is totally fine....so we can stop worrying about accidents kidnappings and such....the rest is up to her....

Christine Ren (12/7 5:32 pm): yes. I'm very relieved about that. But I still don't get it! Why doesn't she want to get all this straightened out?

Me (12/7 5:35 pm): I think she just was not sure about what she wanted to do before she joined.....i almost did not join after I spoke with her on the ph the first time....

Me (12/7 5:37 pm): ..after I did start I was mostly just wondering what she was talking about...every place and program has good and bad sides to it....she focused on the bad....

Christine Ren (12/7 5:41 pm): Really? I had absolutely no idea that she had any complaints at all. And I can read people pretty well. I agree about nothing being perfect, but she and Duane

Christine Ren (12/7 5:41 pm): Got on so well, I thought I would have picked up on something.

Me (12/7 5:43 pm): I got the impression that she was not happyi could be totally wrong becaause suck at reading people....she did like duane a lot....said very good things

Christine Ren (12/7 5:45 pm): wow. That's very interesting. Are you unhappy?

Me (12/7 5:45 pm): About him always....

Christine Ren (12/7 5:48 pm): about whom?

Me (12/7 5:48 pm): Yes I m miscreable....if I had any sense I would be on wall st making serious money and going sailing.....no of course I m not unhappy

Me (12/7 5:49 pm): About duane

Me (12/7 5:51 pm): I m happy...now if I could get your bk acct number I would be truely happy....i could tell all prospective fellows what a great place this is....

Christine Ren (12/7 5:53 pm): gotcha. The message got split. I hope Ha Ha. You probably have it already. you know that u can be honest with me and tell me if u r unhappy about something

Me (12/7 5:53 pm): I think kim will be fine....i will be thrilld to share h&ps consent discharges with her when she comes back...i just don't think she's coming....

Christine Ren (12/7 5:54 pm): I agree and we'll have to work out how to distribute that work load for u.

Me (12/7 5:55 pm): Will do that...boss...no really I am happyi m not very diplomatic...so when I whine or complain I don't always want you to do something about it...mostly

Me (12/7 5:56 pm): I m just venting.....nonono....the work is fine I have a system please don't mess with unless I m sucking at it...

Christine Ren (12/7 5:58 pm): U don't suck at all. you are fantastic. But your joking does sometimes. Because many a truth is said in jest.

Me (12/7 6:01 pm): I was not being sarcastic at all I mean it ... I m ok with everything....i m not feeling overworked...

Me (12/7 6:02 pm): I know the stuff I say only I find it funny vs dr fielding...he says stuff that is really funny and doesn't even crack a smile.....

Christine Ren (12/7 6:03 pm): ok. Good.

Me (12/7 6:05 pm): Will see u tommorrow at m & m.... I may cry if they ask me too many questions so u should be there >:-)

Me (12/7 6:06 pm): Shucks wrong smiley face....this is the one I meant :-p

Christine Ren (12/7 6:07 pm): you'll do just fine. G and I will be there. We certainly didn't do anything wrong. I had discussed it with transferring surgeon.

Me (12/8 8:49 am): That was not too bad...a lot more rad signs though that we could have talked about..

Me (12/8 8:50 am): ..so she looks great and m sending her home....

Me (12/8 8:53 am): ...she says she is staying coz of social issues? Her mom spoke to dr. Fielding ?

appointments will not in to you.

Did u ever get a chance to talk to kim's mom ? Is there any news at all...i m worried coz she would txt me every couple of days and then suddenly stopped.....

I think I should to her appt make sure she is ok so we can all stop worrying she is locked up in some gungeon....

...so I went to see kim she was there and fine according to her downstairs neighbour...but she woulddnt answer hr door..that may be the last I worry about her
wow. That's very worrying for her. She has really lost it. I can't say I have ever seen such behavior. She's really going to screw herself and I feel so bad for

For her

...yeah..but her neighbor says she is totally fine.....so we can stop worrying about accidents kidnappings and such....the rest is up to her....

yes. I'm very relieved about that. But I still don't get it! Why doesn't she want to get all this straightened out?

I think she just was not sure about what she wanted to do before she joined.....i almost did not join after I spoke with her on the ph the first time....

..after I did start I was mostly just wondering what she was talking about...every place and program has good and bad sides to it....she focused on the bad....

Really? How come?

...barrie and me have a bet...barrie thinks she will come back...i don't think so....

Really? I had absolutely no idea that she had any complaints at all. And I can read people pretty well. I agree about nothing being perfect, but she and Duane

Got on so well, I thought I would have picked up on something.

I got the impression that she was not happyi could be totally wrong becaause suck at reading

people....she did like duane a lot....said very good things

wow. That's very interesting. Are you unhappy?

I m happy...now if I could get your bk acct number I would be truely happy....i could tell all prospective fellows what a great place this is.....

gotcha. The message got split. I hope Ha Ha. You probably have it already. you know that u can be honest with me and tell me if u r unhappy about something

I think kim will be fine....i will be thrilld to share h&ps consent discharges with her when she comes back....i just don't think she's coming.....

I agree and we'll have to work out how to distribute that work load for u.

Will do that...boss...no really I am happyi m not very diplomatic....so when I whine or complain I don't always want you to do something about it...mostly

I m just venting.....nonono....the work is fine I have a system please don't mess with it..unless I m sucking at it...

U don't suck at all. you are fantastic. But your joking does sometimes. Because many a truth is said in jest.

I was not being sarcastic at all I mean it ... I m ok with everything....i m not feeling overworked...

I know the stuff I say only I find it funny vs dr fielding...he says stuff that is really funny and doesn't even crack a smile.....

Good.

Will see u tommorrow at m & m.... I may cry if they ask me too many questions so u should be there >:-)

Shucks wrong smiley face....this is the one I meant :-p

you'll do just fine. G and I will be there. We certainly didn't do anything wrong. I had discussed it with transferring surgeon.

Hi m& m starts at 745 today...interview day....on our way.

thank god. We overslept the alarm.

U have time I m sure 7 45 means 8....what wth all residents milling around trying to get at the donuts....

That was not too bad...a lot more rad signs though that we could have talked about..

...so she looks great and m sending her home....

...she says she is staying coz of social issues? Her mom spoke to dr. Fielding ?

I need to speak w/ her. I heard. You did great. What happened to the OR photo?

...i sent it to nichola as attachment...i m not sure why she did not put it in....will check my sent boxbut very sure it was attached...ok ...

..i m calling social worker to talkto her too..maybe that will help resolve it....

Hi... is going home. is going to try get her bed...i wrote all scripts/letter...kim showed p at meeting duane tells me...

One-year post-graduate clinical fellowship in laparoscopic bariatric surgery

Program Director: Dr. Christine Ren

DEFENDANT'S
EXHIBIT

D2

Introduction

Laparoscopic bariatric surgery is a growing field that requires training in both technical laparoscopic skills and the clinical care of the bariatric surgery patient. The laparoscopic skills required for all bariatric surgery are advanced techniques that reach beyond the scope of a general surgery residency. This fact also pertains to the specific nutritional, medical and surgical aspects of the short and long term care of the bariatric patient. There is presently no accredited fellowship in existence in this specialty, which will hopefully change in the future as it is presently being addressed by the American Society for Bariatric Surgery.

Currently, NYU has one non-accredited fellowship in laparoscopic bariatric surgery, introduced in the current academic year under Program Director Dr. Christine Ren. In January 2004, Dr. George Fielding joined the Bariatric Surgery service, and the service's caseload is expected to double by December 2005. Given this increase, Dr. Ren proposes adding a second clinical fellow to the service to further develop clinical expertise and research in this specialty. Drs. Ren and Fielding are the only surgeons in the country who perform four different types of laparoscopic bariatric procedures, which is attractive to many fellowship applicants.

The Bariatric Surgery practice involves a comprehensive weight loss program which sees over 75 new patients and 250 follow-ups a month, with approximately 500 laparoscopic bariatric surgeries performed a year. The clinical volume will be able to support two full-time post-graduate fellows without impinging on the clinical and operative experience of the surgical residents. Dr. Ren, Dr. Fielding and other primary laparoscopic attending surgeons who work with the fellow will maintain full-time responsibilities as teachers in the NYU Surgical Residency Program. The additional fellow will also have research responsibilities in writing IRB protocols and academic articles, as well as, participating in teaching laparoscopic skills to the surgery residents. Dr. Ren will serve as Director of the laparoscopic bariatric surgery fellowship and as proctor to the fellow.

Scope of Practice

The laparoscopic fellowship is a one-year non-accredited clinical training year specializing in advanced techniques of minimally invasive surgery. The fellow must have completed a formal general surgery training program. The scope of practice includes both clinical and academic responsibilities as outlined below.

I. Clinical Training and Responsibility

The clinical experience of the laparoscopic fellow should involve technical training of advanced laparoscopic skills in the operating room, pre-operative evaluation of the patient and post-operative care of the patient. The fellow should be involved with an average of 200 major advanced minimally invasive operations during the one year

training. The fellowship experience should not impinge or compromise the laparoscopic experience for the general surgery residents.

A. Operative Responsibilities

- i. The fellow is expected and encouraged to be involved with all surgeries involving advanced minimally invasive techniques.
- ii. In order to maintain laparoscopic training for surgical residents, operations involving basic laparoscopy skills, such as cholecystectomy and appendectomy, should be attended by the surgical residents. The fellow may assist in or perform these operations if a surgical resident is not available. The fellow may also assist/teach the resident during these operations, as long as the attending surgeon is present.
- iii. The fellow may assist any attending surgeon, other than the primary laparoscopic attending surgeons, on an operation involving advanced laparoscopic skills, if asked by the attending surgeon, as long as a surgical resident is involved as well. This may be exempt if no surgical resident is available.

B. In-Patient Clinical Responsibilities

- i. The fellow is responsible for performing hospital rounds on all patients he/she operated/assisted on. The fellow is encouraged to and can round on patients operated on by the primary laparoscopic attending surgeon, but whom the fellow did not operate/assist on.
- ii. Complications occurring in post-operative patients should be addressed by the housestaff and report first to the fellow. The fellow may perform a clinical assessment prior to communication with the attending surgeon. The fellow should be involved with all operations required as a result of post-operative complications (ie. Re-exploration for bleeding).
- iii. The fellow may perform in-patient consultations with subsequent communication with the attending surgeon.

C. Out-Patient Clinical Responsibilities

- i. The fellow will attend office hours with the attending surgeons and be involved with pre-operative evaluations for surgery. This may typically include a history and physical examination, prior to the patient's meeting with the attending surgeon. Post-operative follow-up can be performed by the fellow under the supervision of the attending surgeon.
- ii. Post-operative office-based procedures may be performed by the fellow under the supervision of the attending surgeon, or if minor, may perform them independently when deemed appropriately adept.
- iii. The fellow may accept patient phone calls and perform telephone evaluations with the supervision of the attending surgeon. This may involve on call weekends or holidays. All discussions will be reviewed with the supervisory attending.

II. Academic Experience and Responsibilities

Academic activity is a critical aspect of the minimally invasive fellowship, which should be structured to engender critical thinking and scientific methodology.

A. Research

- i. The fellow is expected to participate in clinical research that may include retrospective data review, prospective data collection or individual clinical report. Projects may be in the form of academic abstracts for poster or oral presentation, video presentation or academic papers for journal submission. The fellow is expected to present at academic conferences if his/her abstract is accepted. The fellow would not be responsible for travel expenses.
- ii. The fellow may be expected to partake in the writing of grant and/or IRB proposals for future clinical studies.

B. Teaching

- i. The fellow is encouraged to attend hospital teaching rounds and be involved with resident and medical student education.
- ii. Attendance at surgical conferences such as Grand Rounds and Morbidity/Mortality conference is expected. The fellow may be asked to participate and present at either conference by the attending surgeon or the department.
- iii. Teaching of laparoscopic skills to surgical residents will be done in a structured laparoscopic lab. The fellow is expected to participate in such labs, as well as, provide instruction of basic skills in the operating room.

III. Ethical Conduct

Ethical conduct is expected of all individuals towards peers, patients, students and staff members. All patients are to be treated with empathy and respect. Unprofessional behavior will be directly addressed and appropriately reprimanded.

Funding

The clinical fellowship will be supported by industry. Contractual agreement for funding will require that no restraints or exclusionary clauses be placed on academic freedom to use products of other companies. The fellowship will be funded by an unrestricted educational grant, with no financial or political expectations/requirements of the fellow to the sponsoring company.
